About Me

A recent Diploma (D-3) graduate in Informatics Engineering with a strong passion for IT systems, automation workflows, and software development. Combining an academic background in full-stack web and mobile development with 3 years of professional experience in industrial operations, I bring a unique blend of technical problem-solving and process-oriented discipline. I possess excellent communication skills to bridge technical concepts with non-technical users, a strong sense of responsibility, and a continuous drive to learn and troubleshoot hardware, software, and connectivity issues.

Skills

IT Support & Troubleshooting (Hardware/Software) | IT Asset & Access Management | Workflow Automation & Scripting (PHP, Laravel, Flutter) | Database Management (SQL, Firebase) | Technical Documentation | Cross-Functional Communication | System Integration & Troubleshooting Tools

Work Experience

July 2025 - April 2026 | PT XYZ | IT Systems Developer (Final Academic Project)

- Designed and developed a comprehensive web-based application ("Sistem Pengajuan Cuti dan Izin") to automate the employee leave and permit management system.
- Streamlined manual HR workflows into a centralized digital platform using PHP and Laravel, significantly improving data accessibility and reporting accuracy.
- Maintained clear IT documentation for the system's architecture and user access setup to ensure easy onboarding and usage for non-technical administrative staff.

May 2022 - May 2025 | Panasonic Industrial Devices Batam | Logistics Operator

- Managed the receipt, storage, and distribution of goods while maintaining strict inventory control and accurate data entry using ERP/WMS systems.
- Coordinated closely with various departments, demonstrating strong communication skills to explain operational workflows and resolve discrepancies efficiently.
- Maintained detailed operational documentation and managed the condition of departmental physical assets, ensuring high productivity and workflow continuity.

February 2023 - June 2023 | Digital Talent Scholarship | Database Internship

- Learned and implemented database management concepts using SQL and Oracle Academy.
- Honed data management and analysis skills, optimizing database queries which provides a strong foundation for managing IT asset records and system access setups.

Education

2022 - 2026 | Batam State Polytechnic | Diploma (D-3) in Informatics Engineering

- Status: Graduated (Final Document Submission Stage)
- Relevant focus: Information Systems, Web and Mobile Application Development, Database Management, and IT Troubleshooting. Actively follows the latest hardware and software updates (including Android/iOS environments) to maintain up-to-date technical knowledge.
